Patient Injury Identification

Draw or shade in the location of your body injuries as a result of your most recent accident. Describe, by connecting a line to the area of the body diagram. Note pain, stiffness, weakness, numbness, cuts, black and blue marks, swelling and scars. Carefully scan your entire body pushing on areas to note tenderness. Move arms, legs, back including pain during activities such as lifting, bending and working. This is very important so the physician doesn't overlook any injuries.

CHAMBERS MEDICAL GROUP
INFORMED CONSENT TO TREATMENT

The purpose of this form is to make you, the patient, aware of the possible risks of the different treatment modalities routinely provided at Chambers Medical Group. If you are referred to one or our specialists (orthopedic surgery, interventional pain management, etc.) they will have an additional form to advise you of the risks of their procedures.

MEDICATION: possible risks include allergic reaction, dependence, liver and kidney function problems, affects on heart, drowsiness, etc. Caution should be used as medication can mask progress, and the danger of side effects and damage to the health of the person taking the medication is well documented. Risk probability is moderate.

THERAPY: possible risks include burns induced by heat (causing temporary pain and possible blistering), temporary pain due to massage or adjunctive therapies. Risk probability is extremely rare.

TRIGGER POINT INJECTIONS: possible pneumothorax, localized reaction to medication, allergic reaction. Risk probability is extremely rare.

CHIROPRACTIC CARE: possible fracture of bone, sprain of ligament, strain of muscle, cerebrovascular injury (stroke) could occur upon severe injury to the arteries of the neck with an extension-rotation-thrust atlas adjustment - that type of adjustment is NOT performed in our offices. Risk probability is extremely rare.

OTHER PROBLEMS: there may be other problems or complications arising from treatment such as massage, traction, etc., other than noted above. These other problems occur so rarely it is not possible to anticipate/explain them in advance. Risk probability is extremely rare.

ALTERNATIVE TREATMENTS

HOSPITALIZATION: proven expensive and exposes the patient to communicable disease and possible doctor/staff mishap. Risk probability is moderate.

SURGERY: risks include reaction to anesthesia, doctor error, and the risks imposed by hospitalization during convalescent period. Risk probability is substantial.

NON TREATMENT: can result in adhesions, pain, and reduction in joint mobility, which can lead to degenerative joint disease. Risk probability is moderate.

At **CHAMBERS MEDICAL GROUP** we use a system of health care delivery. As with any health care system, we cannot promise a cure for any symptom, disease, or condition as a result of treatment in this clinic. We will always give you our best care, and if results are not acceptable we will refer you to another provider who we feel will better assist your situation.

If you have any questions about the above information, please ask your doctor. When you have a full understanding of this consent form, please sign below and date below.

I hereby authorize and direct **CHAMBERS MEDICAL GROUP** to provide such service as they deem reasonable and necessary.

I HEREBY STATE THAT I HAVE READ THIS CONSENT FORM.
